SUMMARY

Frontend/Angular Developer with **3.6 years of experience** building scalable, responsive, and user-friendly web applications. Expert in **Angular, TypeScript, RxJS, and Ionic**, with experience integrating REST and GraphQL APIs. Skilled in **component based architecture, state management (NgRx/BehaviorSubject), unit testing (Jest), and performance optimization**. Seeking to contribute to a forward-thinking organization leveraging modern frontend technologies.

SKILLS

Frontend : HTML, CSS, Bootstrap, Angular, JavaScript (ES6+), TypeScript, Ionic, jQuery, React (Basics)

Backend & Databases: Java Full Stack, Node.js, REST API, GraphQL, Firebase, .NET

Tools & Platforms: Git, GitHub, JIRA, Postman, Swagger, Visual Studio, VS Code, Eclipse, IntelliJ

Monitoring & Productivity: Prometheus, Grafana

Soft Skills: Adaptability, Problem Solving, Teamwork, Communication, Time Management, Presentation Skills.

WORK EXPERIENCE

Cognizant Technology Solutions, India - Software Engineer

Oct 2021 – Mar 2025

Project: AKSO Managed Capacity - Associate (Dec 2023 – Mar 2025)

- Designed and delivered a B2B web application for sales management and tool tracking, streamlining operations in the **Oil & Gas** sector.
- Deployed **WeShop**, a web app to manage tool rentals/returns, improving inventory visibility and reducing tracking errors by **40%**.
- Delivered **Mips 2.0**, a cross-platform (Android/iOS) inventory tracking app using Ionic and Cordova, boosting on-field productivity by **25%**.
- Designed and maintained **enterprise-grade internal tools** with Cordova, saving teams an estimated **10+ hours/week** in reporting effort.
- Created **responsive UIs** with Angular, Ionic, Bootstrap, jQuery, and CSS, leading to a **20% increase in adoption** among end users.
- Applied **Agile** methodologies (Scrum) for iterative delivery, bug tracking, and continuous improvement.
- Collaborated with cross-functional teams (UI/UX, QA, Product Owners) to deliver user-friendly interfaces aligned with business requirements.
- Implemented state management, lazy loading, and reusable components to improve application performance and maintainability.

Project: Marketplace Engineering - Programmer Analyst (Oct 2021 – Nov 2023)

- Developed a B2C **e-commerce** platform serving **10,000+ active users**, enabling secure and seamless transactions.
- Built dynamic Angular frontend modules (v12+), creating responsive and interactive user interfaces for 10,000+ active users.
- Integrated REST and GraphQL APIs using Angular HttpClient and RxJS Observables for efficient data handling.
- Developed backend services in Java (Spring Boot, Microservices) to support frontend features, improving data retrieval speed by 35%.
- Implemented secure API integrations with OAuth 2.0/JWT and Spring Security.
- Applied unit testing with Jest for frontend and JUnit for backend services, achieving high code coverage.

- Optimized application performance with lazy loading, reusable components, and modular design.
- Led site-wide upgrades for Raptor and Raptor IO applications, reducing downtime by 20%.

CERTIFICATIONS

Angular Developer - Foundation (HackerRank)
JavaScript Developer - Foundation (HackerRank)
Java Full Stack Developer (Cognizant)
