SUMMARY

Full Stack Developer (Angular + Java) with over 4 years of experience delivering scalable, high-performance web applications. Hands-on expertise in **Angular, TypeScript, RxJS, Ionic, Java, Spring Boot, REST/GraphQL APIs, MySQL, and microservices**. Skilled in architecture, state management (**NgRx/BehaviorSubject**), testing (Jest/JUnit), CI/CD, and optimizing both frontend and backend performance.

SKILLS

Frontend : HTML, CSS, Bootstrap, Angular, JavaScript (ES6+), TypeScript, Ionic, jQuery, React (Basics).

Backend & Databases: Java Full Stack, Node.js, REST API, GraphQL, Firebase, .NET.

Tools & Platforms: Git, GitHub, JIRA, Postman, Swagger, Visual Studio, VS Code, Eclipse, IntelliJ.

Monitoring & Productivity: Prometheus, Grafana.

Soft Skills: Adaptability, Problem Solving, Teamwork, Communication, Time Management, Presentation Skills.

WORK EXPERIENCE

CODEFOLKS Technologies, Kochi

Software Engineer | *April 2025 – December 2025*

- Built and supported web applications using **Angular, Java, Spring Boot, and RESTful APIs**.
- Enhanced UI components, achieving a 30% reduction in page load time and a 20% improvement in user task completion across core workflows.
- Connected backend services with frontend modules and managed **API integration and consumption**.
- Facilitated **bi-weekly meetings** with product managers, designers, and QA engineers to align on product specifications, leading to a 15% decrease in product defects and faster release cycles.
- Resolved bugs, optimized existing modules, and contributed to **code reviews** to maintain high code quality and stability.
- Followed **Agile/Scrum methodologies**, actively contributing to sprint planning, execution, and timely feature delivery.

Cognizant Technology Solutions, India

Software Engineer | *October 2021 – March 2025*

Project: AKSO Managed Capacity - Associate

December 2023 – March 2025

- Engineered a B2B web application for sales management and tool tracking, streamlining operations in the **Oil & Gas** sector.
- Deployed **WeShop**, a web app to manage tool rentals/returns, improving inventory visibility and reducing tracking errors by **40%** by real-time visibility and controlled check-in/check-out processes.
- Released **Mips 2.0**, a cross-platform (Android/iOS) inventory tracking app using Ionic and Cordova, boosting on-field productivity by **~25%** by cutting task completion time via streamlined UI flows, offline sync, and faster data updates.
- Designed and maintained **enterprise-grade internal tools** with Cordova, saving teams an estimated 10+ hours/week in reporting effort.

- Created **responsive UIs** with Angular, Ionic, Bootstrap, jQuery, and CSS, leading to a 20% increase in adoption among end users.
- Utilized **Agile Scrum practices** for iterative delivery, defect resolution, and continuous enhancement.
- Collaborated with cross-functional teams (UI/UX, QA, Product Owners) to deliver user-friendly interfaces aligned with business requirements.
- Applied state management, lazy loading, and reusable components to boost performance and maintainability.

Project: Marketplace Engineering - Programmer Analyst

October 2021 – November 2023

- Delivered a B2C e-commerce platform serving **10,000+ active users**, ensuring secure and seamless online transactions.
- Built scalable frontend modules using **Angular (v12+)**, delivering responsive and interactive user interfaces.
- Integrated **REST and GraphQL APIs** with Angular HttpClient and RxJS Observables for efficient state and data handling.
- Developed backend services using **Java, Spring Boot, Microservices, Spring Data JPA**, improving data retrieval speed by 35%.
- Implemented **OAuth 2.0 / JWT** authentication and enforced secure API communication using Spring Security.
- Performed unit testing using **Jest** (frontend) and **JUnit** (backend), maintaining high code coverage and stability.
- Improved application performance through **lazy loading, modular architecture, and reusable UI components**.
- Led application upgrades for **Raptor and Raptor IO**, reducing system downtime by 20% and improving reliability through phased releases, dependency upgrades, bug fixes, and robust exception handling.
- Participated in code reviews, requirement analysis, and sprint ceremonies as part of the Agile development process.
